

PRO COCKROACH GEL

SUREFIRE®

DIRECTIONS FOR USE

DO NOT place in areas that are routinely washed.

DO NOT apply this product in any areas easily accessible to children or animals.

SITUATION	PEST	RATE
Domestic, commercial and public service buildings including farm buildings, food processing establishments, factories, hospitals, hotels, homes, kitchens, offices, restaurants, retail outlets, storerooms, vehicles and other situations which fall within these definitions.	German and other common cockroaches	Apply at least 2 spots per m ² . Increasing the number of spots (up to 5/m ²) may be required for heavy infestations or if the American cockroach is the main pest. Recommended spot size is approximately 5 mm diameter (0.1 g) or the size of the spot indicated below. ●

CRITICAL COMMENTS

Conduct a thorough inspection of the premises and then place gel in areas near cockroach harbours or in sheltered areas where signs of cockroaches are evident.

Replenish gel if previous application has been consumed or cockroaches remain a problem; increasing number of spots if necessary.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

To apply the gel, remove the cap on the nozzle and touch the tip to the surface to be treated and slowly depress plunger until sufficient gel is dispersed. Recap the dispenser after treatment is completed.

Where maintenance treatments form part of the professional pest controllers contract, it is recommended that cockroach activity be monitored where gel has been applied one month after initial treatment or at more regular intervals in areas of high infestation.

For insecticide resistance management SUREFIRE PRO Cockroach Gel Bait is a group 2B insecticide. Some naturally occurring insect biotypes resistant to SUREFIRE PRO Cockroach Gel Bait and other group 2B insecticide may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population. If this product or other group 2B insecticides are used repeatedly, the effectiveness of this product on resistant individuals could
