

FIPRONIL*

GRANULAR ANT KILLER

superior ant control

Fast acting, non repellent control of ants in turf and external surrounds of buildings and structures.

Check out overleaf for more details.

FIPRONIL*

GRANULAR ANT KILLER

FIPRONIL Granular Ant Killer - the perfect choice for controlling nuisance ants AND for eliminating the nest.

The active, Fipronil, is extensively documented as being one of the best non-repellent actives available. Combined with the natural interactions between ants (as with termites), this assists greatly with distribution of the Fipronil within the colony for rapid control.

FEATURES:

- ◆ Non-repellent FIPRONIL active
- ◆ Fine silica quartz carrier assists with ease of application of the insecticide
- ◆ Controls a wide variety of nuisance ants irrespective of their food preferences
- ◆ Compatible with other ant control strategies & products
- ◆ Rapid action
- ◆ Continues to work after rain
- ◆ Suitable for external application to gardens, lawns, concrete paths, pavers or directly to nests
- ◆ Australian manufactured product

Pack sizes:	10 Kg
	Carton quantity:
500g	
2.5 Kg	12

GROUP 2B INSECTICIDE
